

Bonjour everyone!

We have had a great first 2 months and are on our way to a wonderful school year. The children have settled into the daily routines and schedules of the Preschool. They have learned the names of their classmates and they have helped to establish the rules and expectations for their class such as respect and care for themselves and others. In academic, they demonstrate their understanding through interactive play, structured and unstructured learning and self-discovery. We are very proud of every child's accomplishments.

November's themes for the 4 year old: Dentist, five senses and music

We will talk about how important it is to have good teeth and how to best take care of them. In our five senses unit we will listen to different sounds, taste four different tastes. Guessing what is the object without looking but only by touching. Try to identify odors by smelling them.

November's themes for the 3 year old: Body parts and transportation

We will learn the French name of different parts of our body by singing, dancing and painting. How many wheels on this transportation? And learn the name of different transports.

Dates to remember:

November 8 and 9: Blue Day

November 15 and 16 : Crazy Hair Day

November 22: School Closed

November 21 and 27: Montrer-Parler (Show'n tell)

Montrer-Parler:

3 yr old: Your child will bring a toy from home to share with everyone in the classroom. If your child is not ready to share his/her object, please do not bring it to school. Your child will describe the toy (object) by the color and why he/she likes it in front of the classroom.

4 yr old: Your child will bring an object that makes sounds. He/she will describe the toy or object by the color, the shape and sharing how the toy makes sounds.

Happy November everyone!

Madame Claudette
