

Bonjour everyone!

We have had a great first 2 months and are on our way to a wonderful school year. The children have settled into the daily routines and schedules of the Preschool. They have learned the names of their classmates and they have helped to establish the rules and expectations for their class such as respect and care for themselves and others. In academic, they demonstrate their understanding through interactive play, structured and unstructured learning and self-discovery. We are very proud of every child's accomplishments.

November's themes for the 4 year old: Dentist, five senses and music

We will talk about how important it is to have good teeth and how to best take care of them. In our five senses unit we will listen to different sounds, taste four different tastes. Guessing what is the object without looking but only by touching. Try to identify odors by smelling them.

November's themes for the 3 years old: Body parts, music and visit to the north pole.

We will learn the French name of different parts of our body by singing, dancing and painting. Learn to hold a tempo, what's mean rhythmic and knowing a few musical instruments. We will talk about the North pole and see who live there...

Dates to remember:

November 5 and 6: Blue Day

November 11: No school closed

November 12 and 13: Crazy Hair Day

November 16 and 17: Photo day

November 18: Montrer-Parler (Show'n tell)

November 20: School Closed

Montrer-Parler: 4 yr old: Your child will bring an object that makes sounds. He/she will describe the toy or object by the color, the shape and telling how the toy makes sounds.

Happy November everyone!

Madame Claudette
